

## VIKING WINE RACKS

CUSTOM WINE STORAGE

### **Viking Wine Racks Certified Dealer Design Fee Policy December 2024**

Viking Wine Racks offers an initial comprehensive design at no charge. **A Viking wine racks design expert will provide a preliminary design presentation (PDF), within 5 business days for dealer review.**

- Initial Design Details: The free initial design includes room dimensions but does not specify measurements for individual wine rack components. This design service applies to standard Viking products and does not cover highly complex custom configurations.
- Design Presentation: The initial design presentation includes a 3D color cover image, 2D wall elevations, and a floor plan, giving a clear visual representation for client discussions.

Viking Wine Racks reserves the right to charge a design fee based on the project's scope and complexity. **Any adjustments to the original design will be billed at \$90 per hour.** Should the project sell, the Design B fee will be credited toward the purchase price. Design fees will be included in the final project balance at shipping. If the project does not sell within 60 days, an invoice will be issued for design fees, which will be credited toward the purchase price if the job subsequently sells.

Viking Wine Racks provides design services exclusively to facilitate the sale of wine storage solutions using Viking products. Paying a design fee does not grant ownership of the design; the fee solely offsets our design costs.

We are committed to delivering top-quality wine storage designs, supporting our dealers in providing exceptional client experiences and closing sales.
